# Technology and Services

Optimize your Total Cost of Ownership with Cloud adoption

## Qoris® ERM

### The Technology

Built on current and relevant JavaScript technologies

Hosted securely on AWS Cloud

Available as a SaaS subscription

Any device 24x7 and Android / iOS

### Associated Services

- Single tenant and multi tenant instances
- Optional SLA upgrade on need basis
- Automatic product updates and data backups
- Optional On-prem or multiple cloud deployments

In today's world, work is no longer restricted to the desk. Qoris® ERM is an any-device software (both Android and iOS enabled) keeping you updated 24/7. We built the product on latest technologies to provide you with a richer UI and superior Ux.

Offered as SaaS and hosted securely on AWS Cloud, experience a superior Total Cost of Ownership (TCO) with Qoris® ERM. This means, other than the annual fee that you only pay, there are no implicit or indirect costs. All product updates and data back-ups are our responsibility.

# Commercial value proposition

Experience a superior ROI with Qoris® ERM

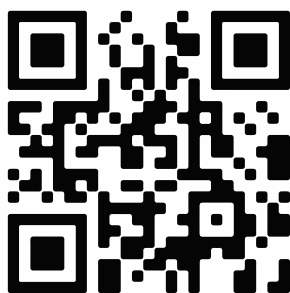

## Qoris® ERM

### ROI Drivers

- Modular and industry focus to suit every organization need
- Benefit of a repeatable and person independent process
- Optimization of risk management FTE cost
- Monetary savings from better governance

### Find out your organization's cost of risk

Use the QR code below to generate your Cost of Risk report!

Having a comprehensive, person-independent and repeatable risk management process builds trust in your customers and stakeholders. With Qoris® ERM, Organisations are instantly enabled to prioritise and respond to enterprise wide risks and scale across Locations, Geographies and Businesses. Also FTE costs are optimized to now focus on risk management rather than risk information management.

Use Udbhata's Cost of Risk Calculator to understand how Qoris® ERM can improve your ROI on risk management cost.
